DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the first position corresponding to a first suspension setting and second position corresponding to a second suspension setting of claim 1, the threadform of the adjustment follower recited in claim 7, and the cable moment arm of claim 13 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 2,6,7,10,11,14,15,21,25 and 26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Re claims 2,6,10,14,21, and 25 the recitation of "substantially" is unclear. Either it is or is not rigid.
4. Re claim 7 the recitation of "substantially" is unclear. Either it is or is not prevented from rotation.
5. Re claim 15 the recitation of "substantially" is unclear. Either it is or is not capable of concentric position.
6. Re claim 26 the recitation of "substantially" is unclear. Is it parallel or not and is spaced apart or not?

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-6,11-22, and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Yamane USP 6155132.

Art Unit: 3682

Re claims 1-6, 11-22, and 26 Yamano discloses a(n):

Claim Rejections - 35 USC § 103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

10. Claims 7-10 and 23-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamane in view of Ekins USP 5966993.

Re claims 7-10 all of the claim limitations are met, as stated above, but a pin/mating pin is not disclosed.

Ekins discloses a pin/mating pin (54) for the purpose of preventing the coarse threaded sleeve from turning (Column 3, lines 60-67).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the adjustment follower of Yamane and employ a pin, as taught by Ekins, for the purpose of preventing the coarse threaded sleeve from turning (Column 3, lines 60-67).
